

Jordon Reichenbaugh

Regional Sales Manager – Clean Energy Services

Hillsdale College Filter Project: Simpson, McIntyre, Moss.

Clean Energy Services is proud to announce that Hillsdale College will integrate new reusable air filter technology into its campus. Through this technology, Hillsdale will see tremendous cost savings of approximately \$196,000 over the next 15 years. This decision also eliminates the burden of removing from its campus approximately 54,000 lbs., or 222.96 cubic yards, of waste. As an added benefit, the reusable filters will prevent approximately 17,145 kg of CO₂ from being released into the atmosphere. Hillsdale College has demonstrated a commitment to efficiency and financial stewardship that will have a positive and long-lasting impact on its campus, and Clean Energy Services is honored to be a part of it.
